Comments: Hi... we visited the nursery Wed 8th Nov at approx 10am. There are +- 10 ducks in a tiny enclosure. The other animals at the back were on baking sand in the sun, incl q goose who appears to be on eggs, she seemed to be panting, beak open in the sun, there is a makeshift asbestos cover toward the back but the tyre she is nesting on is not under it, although it was baking hot there was no water or even the remnants of water or food in the enclosures. Usually one would see some evidence of food/water.
