General Report Comments: Johannes the foreman let me on the farm to do an inspection. I saw +-50 Merino sheep with lambs on the farm. Johannes told me that some of the lambs are born during the night that's why they found some of them dead in the morning. Johannes also told me that it can be because of the cold or that the mother can sense that the lamb is not healthy and then decides not to feed it. While doing inspection I did not observe any sick,injured or dead sheep. There is some trees in the paddocks where the sheep can go under for shelter. Water and food is also available. Nfa until further notice.
