General Report Comments: There was no people at home. I saw 1x black and tan Gsd x male and 1x black and tan Gsd female. Both dogs body conditions is acceptable and on the steep I did observe food and water for the dogs. The male however has some sort of wound on his nose that he scratches and I could see that it irritates him. According to the complainant she has not seen the owner for quite some time. From what I have observed there is definitely someone feeding the dogs. I issued a warning for owner to contact me because I want to know if the dogs are abandoned and if the owner has treatment for the male Gsd x nose. Will follow up.
