Comments:	I went to Village Vet and spoke with the receptionist as well as Dr . GINA. They checked the system and found no records of the dogs being brought in. Dr. GINA also mentioned that she qould have remebered, and can confidently say the dog was jot brought to them. Dr. Gina then advised I go to the petshop on the corner and ask them. I left and went to the petshop. I was met by a lady who identified herself as Cherelee. She mentioned the dog was brought to them on Saturday and she gave them deworming liquid for the dog. Wormstop. I will discuss the case with my manager, Insp. Van Zyl and ask her advise on the way forward.
