Comments:	Called the owner, Louis Andrag. He informed me that he has a veterinarian, Dr. Trichard from George, a wildlife Veterinarian coming out this weekend to have a look at the Zebra. He has forwarded photos and videos to the veterinarian and the veterinarian advised that he will come out and assess in person. Louis advised that he will contact me after the veterinarian visit to provide me with feedback. Although it seems long before the veterinarian can come out, I belief it is the best route. As not any other veterinarian (domestic, livestock) will be able to provide a propper diagnoses and prognoses regarding the foal. The owner has procured veterinary attention, however the specialed veterinarian can only assess over the weekend. If I dont receive a call from owner over the weekend, I will follow up on Monday.
