| Comments:       | <p>The dog that was allegedly hit with a Panga belongs to the father. The dog is not on the property now. Bianca indicated that the dog runs in the street, and that the dog was apparently here this morning but that he jumped over the wall and ran off. She advised that the cut is not bleeding and that the hair is missing. I advised they take both dogs for treatment and that they keep this dog in the yard when I come to do my follow up.</p> <p>There is 1x other dog free roaming inside the property, no APA contraventions observed regarding this dog.</p> |
