General Report Comments: I did a drive through the area today and inspected the cattle who are normally out in the field. I saw they were at far top and drove to them to see if there are any concerns. The cattle appeared to be in good condition, a few cows are slightly underweight, however they calved recently and their weight should improve within the next month.

I saw a few goats in the camps today and they also appeared to be in good condition with no veterinary or health concerns observed.

I will conduct a kraal to kraal inspection next week, I will early in the morning as to when the animals area still in the kraals and owners likely to be present as well.
