General Report Comments: Upon arrival, it appeared as if no one was home as there was no response give to my presence.

I could see the animals over the boundry wall. I observed 2x GSDx dogs free roaming inside the property. The one kennel is still broken, and it seems as if the owner is not going to fix it in due time, eventhought it was mentioned that he will fix this over the past weekends. The one side of the property, infront of the kennels, was also observed unhygienic as the area was scattered with feaces.

I proceeded to issue a warning (W5233) stating:

1. The provided kennel is too small to provide both dogs with adequate protection against the weather elements.
2. Either provide an additional kennel or fix the broken kennel.
3. The one section, in front of the kennels, is riddled with animal excrement, feaces, and must be thoroughly cleaned and hygienically maintained thereafter.

7 days were given to comply.
