General Report Comments: Upon arrival, I was met and granted access by Rebecca, the owner's daughter.

Blackie was lying under a chair on a mattress. Blackie appeared to be Bright, Alert and Responsive.

There are no pictures on the case of how Blackie previously looked and I cant cross reference to verify if there is progress.

The veterinary report is also not attached to the case, and I cant verify the current treatment regime, however, Rebecca advised that the sog is weekly receiving tableta that her mother givea to the dog.

I will follow up again next week, and there after to see progress.

The dog is very old, so it might take some time before the dogs coat is fully restored.
