ADEQUATE SPACE AVAILABLE	No ***	Chained
CLEAN LIVING ENVIRONMENT	Yes	
ANIMALS IN GOOD CONDITION	Yes	
VETERINARY PROBLEMS / HEALTH CO	No	
CONFINEMENT OF ANIMALS	Static Chain - inadequate length **Busy fixing the gate and making the fence higher	

General Report Comments: Upon arrival, I was granted access to the property by the owner, Sibavula. He has a shuttle service driving to the Northern Cape every 2nd to 3rd day and is seldom home. However, his wife and kids are home in the afternoons and will be able to accomapny me during a follow up inspection.

The owner instructed his eldest son to accompany me to the dog. The dog is kept at the back side of the property.

I observed the dog to be chained to the tree, the chain/rope is approximately 5m long. The dog has a proper leather collar and a large kennel that provides protection/shelter against the weather elements. The dog's living area is clean and no veterinary/healt concerns observed.

I asked why the dog is chained, and I was advised that he tend to jump the fence on the road side, the are almost done by making the fence higher, but they must also fix the gate as he also tries to get through the gate. They ate in process with the fence and the gate and will be done by the end of the month. However, the son advised that if I return by the end of next week that they will likely be done and Ninja will be free roaming.

I provided them with a running chain leaflet, incase something does not work out, and they might take longer then they can place the dog on a runner in the interim.

I will conduct my follow up next week to verify progress
