General Report Comments: While driving in Whipping Street,Saldanha I observed this black and brown terrier x male on a static chain that is about 5 meters long,the chain is coming from the house but the door is closed so it's a bit difficult to measure the exact length of the chain . I stopped and the neighbor approached the Spca vechile. I asked the neighbor if there is any people at number 135 and she told me no,the owner is working. I asked her if she knows the black and brown dog that is chained next door and she said yes his name is Blik. I asked her why Blik is chained and why he does not have a shelter. The lady told me that Blik is chain because the property is not fully enclosed and that Blik sleeps inside the house. I told the lady that we can agree that he sleeps inside the house but when his outside like he is now he needs to have shelter against the natural elements for example, rain,heat,wind and hale. Bliks body condition is acceptable and he does have water available. I explained to the the lady why I'm about to issue a warning and that she must explain to the owner what I just explained to her,she understood. I issued warning W5056 for owner to provide Blik with adequate shelter when he is outside. Will follow up.
