General Report Comments: Upon arrival, the owner, Williams met me outside her house.

I saw the chain has been extended by a cable of approximately 2.5m. The cable has been placed around the pillar attaching to the chain. The total length of the light chain is no 6m. The dog still has 180degree radius of movement providing a total of 12m movment space in lenght. The dog has a kennel, which the dog has easy access to with thick blankets inside.

I saw the dustbin standing infront of the pillar again and Williams advised that if the dustbin is not there that Mia, the dog, then goes around the pillar and gets stuck, restricting her movement space.

Mia has a suitbale material collar fitted, the collar is rather big for Mia, eventhough it is a type of choke collar, the collar cant choke her as it is to big. If Mia had to pull hard enough the collar will easily comes off the head. I tested this myself. The owner does not have money to buy a new collar.

I would advise against a runner at this property as the dog will then have less roaming space. Unfortunately the properties are built in such a way, that they are very close to each other and the dog will then be on the neighbors property if the runner would be a minimun of 5 with an attaching 2m chain.

I will conduct a final inspection next week to ensure all are still in order.
