General Report Comments: Upon arrival, I was met by Mrs Papier, the owner.

I could not get close to the dog as the dog is severely aggressive.

I could see the runner being installed. They used thick wire which is pinned into the ground. The runner is stiff. The runner is approximately 5m long with an attaching 2m medium tickness chain. The dog has a suitbale collar fitted.

Mrs Papier advised that her brother will be fixing the kennel and asked to be granted this week, as he will be home from tomorrow. I granted her this week to modify the kennel. I also explained the importance of a solid floor, which she understood and will relay to her brother. She has in the interim placed a large carpet in the inside, however the dog pulled the carpet out and lies on the carpet outside the kennel. I advised that they look for a conveyer belt as it will be to heavy for the dog to pull, or otherwise they must try to pin the carpet into the floor.

I will follow up next week, to verify progress regaring the shelter.
