General Report Comments: PROACTIVE

Upon arrival, no one appeared to be home as there was no response to my presence.

I observed 1x Crossbreed dog chained to his kennel on the right side of the property under the carport. The chain is approximately 3m long and attached to a material collar fitted on the dog. The dog had a large wooden kennel which provides adequate protection against the weather elements. The dog had water and a fairly clean living area.

I can only assume that the dog is chained due to the low fence (1.2m) and the poor fencing between the neighbor fence on the right.

I issued a warning:
1. Place the dog on a runner.
