General Report Comments: Upon arrival, I was met and granted access to the property by the owner.

I saw the dog tethered to a 5m rope on the left side of the property at the front door. The dog has access to a make shift wooden kennel which provides adequate protection against the weather elements. The dog had water and a clean living area. The owner advised that he asked a friend for a cable to install the runner, however he has not brought it for him yet. I advised that he can use wire or rope as well, as the dog is not very strong and this will also work. He said he will have this sorted within the next 7 days.

I granted him this extension as he has complied with the kennel.
