General Report Comments: Upon arrival, no one appeared to be home as there was no response to my presence.

I observed the dog and it appears as if the skin condition is improving. The only area of concern is the tail and rump, however the hair has grown back and it does not appear to be as dry as previously seen.

The owner was not here for me to ask her about it.

I will do a routine check in 2 weeks time, to monitor progress.

The dog, also appears to have a lump on one of her breasts. It does not appear to be of concern at this stage as it was hanging and not bulging. I will monitor this as well.
