General Report Comments: Upon arrival, I met with the owner, Elricho.

I observed 2x dogs on the property, the 1 dog was free roaming and appears to be in good condition with no veterinary or health concerns observed.

The other dog, the dog in question, is kept on a 25m long light chain with a material band as a collar. The dog apparently jumps the fence.

This dog is emaciated with a BCS of 1/5. According to the owner the dog allegedly had Parvo about a month ago and since then the dog has not gained weight. The owner advised that he will take the dog to the vet on the 15th of September. I informed him that the time period is too long and that I will only grant him time till Monday, 2 Sept 2024 to have the dog assessed by a veterinarian. He advised that he understands and will try to make a plan. If he could not find a way by Tuesday, when I conduct my follow-up he will surrender the dog. He was not willing to surrender the dog today.

I issued a warning accordingly:

1. Provide the dog with veterinary treatment by Monday, 2 Sept 2024.
