General Report Comments: Upon arrival, I was met with the owner.

I observed 1x dog chained at on the right side at the far back of the property. The chain is approximately 4m long. The dog had a material collar fitter with an attaching swivel. The dog has 270 degrees movement space. The dog had a drum, and wooden kennel which provides adequate protection against the weather elements.

According to the owner the dog jumps the fence, as the fence is very low, 1.2m, hence the dog is chained.

I advised that he either placed the dog on a runner or extend the chain, move the pin allowing the dog to have 360 degrees movement space. He understood and advised that he will see to it.

Warning issued stating:

1. Either place the dog on a runner, or
2. Extend the chain by n minimum of 2m, move the pen - allowing the dog 360 degrees movement space.

7 days granted

The owner advised that he won't be present on my follow up, as he will go to Picketberg next week with a friend, but that I am welcome to enter his property and examine the conditions the dog is kept in.
