VETERINARY PROBLEMS / HEALTH CO	Yes ***	Dog is slightly underweight, was dewormed last week
CONFINEMENT OF ANIMALS	Static Chain - inadequate length **	Open area, temporary housing, no fence

General Report Comments: This is the emergency housing area where a few people that lost their homes where moved to.
The dog belongs to SBM55194 (Numbers are written on the wensy houses) dog is kept at the back of this house.

The dog is kept on a static chain, the chain is approximately 5m long, but due to there not being a swivel on the chain has twirled. The dog did not have a suitable collar fitted. The dog has adequate protection against the weather elements in the form of a large wooden kennel. The dog had water.

The dog is slightly underweight, and according to the owner the dog was dewormed last week. The dog is fed 2x dog with Bobtail. I will monitor the dogs weight over the following 4 weeks.

Monika showed me a cable they have and asked if it will be suitable, they used it at their old house. The cable is thick and suitable and will work. Monika advised that she will ask her husband to install the runner this evening as she understood that the dog has little roaming space.

Warning issued:
1. Place dog on runner
2. Provide dog with a suitable collar

3 days granted

ACTIONS

Warning Issued W6696

REPORT OUTCOMES

Follow-up inspection to be conducted 2024-10-14
