General Report Comments: Upon arrival, I was met and granted access to the property by the owner.

I observed both dogs. The dog at the back is still on his runner, attached to his material collar with a swivel. The dog in the front, the Anatolian Shepherd is now on a extended chain as he kept bending the cable for the runner, then the swivel attached to the runner becomes stuck. The chain is approximately 7.5m long attached to the dog's thick and strong material collar with a swivel. The length of the chain is the lenght of the runner, so the dog has sufficient roaming space.

Both dogs have access to adequate shelter, in the form of wooden kennels. Have water and a clean living area. No veterinary or health concerns were observed.

No APA contraventions observed.

Case can be closed as no further action is required.
