Comments:	I contacted NPSCA Inspector Neo from Farm Unit to ask for his advice . Inspector Neo asked me to forward the clip to him which I did. Inspector Neo told me that from the clip he cannot see that the trainer is making contact with the whip on the horse it is next to the horse. He says only at the last part of the clip does it look like the whip touches the horses leg but that was because the horse kicked. He said to me that if that is an incident that happened a while ago nothing can be proven as if there were marks it would be gone by now.
