| CONFINEMENT OF ANIMALS          | Free roaming - in property |                   |

General Report Comments: At the nursery, I found 3 guys who were the owner, Andrew's friends rearranging the his compound and he said the reason for that was to make the place rain-proof. Both dogs were in good physical condition. I asked him about whether they leave the dogs on their own he claimed there is always someone on the nursery and the only time they are not there is when they are at the shops or in the loo a few minutes away from there. I advised them to take the dogs with when and wherever they are able to. No welfare concerns found
