General Report Comments: During our inspection (Snr. Insp. Maila and I), we found about 11 fowls on sale in a movable cage. 7 chickens and 4 ducks. Food and water were provided on the outside each layer of the cage. The fowls appeared to be in acceptable physical condition. The water troughs were soft drink bottles cut on their bottom quarters while food were cut in side halves. We advised them to create water troughs in the same way as the food to allow convenient for all fowls. They agreed to do so. To conduct routine inspection
