General Report Comments: During my inspection on site, I went to the holding area. The cage was moved approximately 2 m right from the original position. I found that the water container appeared to be developing an algae and I brought this to the attention of the dog handler who immediately cleared the water and cleaned the container. The dog appeared to be in acceptable physical condition. No proper and valid PAPA license was presented to me during my inspection but I contacted the operational manager, Mr Ndebele who assured me that they were able to obtain a proper PAPA license and he sent it to my manager Snr. Insp. Maila. To follow up with my manager about the license

ACTIONS

Warning Issued V 0658
