General Report Comments: The gave me access to his unit to see the cat. Kyoto's eye was doing better and appeared to be well-managed by the owner. No flare-ups were seen on the cat. Water and food were provided for the both cats. They sleep indoors in the owner's apartment. The cat was diagnosed with an eye herpes virus which is manageable chronic condition that can regularly be medicated. I told him that he needs to update me on new medication. Matter concluded for now
