To whom it may concern

Blicki, 1y8 month old female intact pitbull was seen by us on 26/09/2024. Temperature, pulses and respiration were normal. Good body condition and a friendly manageable dog.

She presented with hair loss on hind legs and at her tail base. This was treated with a Bravecto (20-40 kg). The flea bite dermatitis will clear up.

If you have any concerns, please feel free to contact us.

Kind regards
