General Report Comments: Upon arrival i hooted and shouted.

I was granted access to enter the property and i shared a nature of complaint.

I observed two dogs at the property slightly underweight. The dogs are roaming freely at the property and they have access to adequate shelter and portable water is provided. I then questioned him when was the dogs dewormed and he stated about two weeks. I also advised him to feed the dogs 3 times a day so they will gain weight. Sihle explained dogs bark when they see monkeys and he doesn't beat his dogs since they don't even leave the property. The property is adequately fenced.

To follow up.
