General Report Comments: There was no one in the property. The dog was kept in the front, there a shelter (verander) but there was no bedding. The dog had bad fly bites on both ears. We left the warning #6455 given till Monday.

On Monday 3 November me and Petra returned to the property and there was noone there. There was still no bedding and the dog looked like it was treated for fly bites because there was pink ointment around it's ears. We left another warning#6456. Later in that afternoon the owner called he said he did buy ointment for the dog and he was applying it everyday. He denied the hitting of the dog. On the 5 November I returned to the property there was a big dog bed and 2 big water bawls. I will keep checking on this dog.
