Phumla is a maid and she granted me access to the property. There are two adult dogs on the property and the male appears to be in a good condition. The female dog is feeding a litter of puppies and it is slightly underweight. The female is clinically alart and based on my judgment it because the puppies are still lactating. The dogs has access to drinkable water and shelter. The living environment is clean and hygienic. Both adult dogs are clinically alart.
