General Report Comments: Address
LOT 33 Max Place
Motala Place

I contacted the complaint to assist so i can find the address. I met Dylan and he pointed the house and i had to to drive to the other side to reach the house that should be investigated.

Upon arrival i met Ivan and shared a nature of complaint. We walked to where the dogs are kept one adult female dog was observed on a static chain. The dog appears to be in a good condition and clinically alert. The dog was in a kennel and the kennel need to be repaired as it can't protect the dog from weather elements. The dog was on a static that that was about 2 meters long and no water was provided. I instructed Ivan to provide water and he complied immediately. I also observed lot of rubbish on the property that can cause the animals to be infested with external parasites. Two puppies were roaming freely and they were in a good condition.

I issued a warning

- To provide animal/s with sufficient fresh water 24 hours daily.
- To provide the animal/s shelter with protection from all weather conditions with clean bedding within 10 days.
- To clean the animal/s living area within 72 hours and keep it clean at all times and free from parasites.
- To untie immediately to roam freely or provide a running chain within 10 days.

I further stated on the warning

- Water must always be provided at all times
- Fix the broken kennel within 10 days.
- Provide a running chain for your dogs within 10 days, so the dog can express animal natural behavior.

You can surrender the dogs to SPCA

ACTIONS

Warning Issued	6158
