General Report Comments: Upon arrival I met Mrs Zama and she granted me access to enter the property.

I shared a nature of complaint and she denied that anyone on the property ever beat the dogs. She stated that the dogs barks when someone is at the gate or when a colony of monkeys is around the area. The owner of the dogs is Sihle who is not home during this inspection.

2 adult dogs and 3 puppies are observed. The dogs appears to be in a good condition and clinically alert. No dog appears to be limping and they're not terrified of Mrs Zama

The dogs are roaming freely on property. There is no sign of a chain. The living environment is clean and hygienic. The dogs have access to portable water and adequate shelter.

I offered a Sterilisation explaining the benefits. Mrs Zama isn't interested and she supported her statement by saying that why they have male dogs only.

I strongly believe the case can be closed. There is no contravention of the animals protection act 71 of 1962 and there is no further action that can be taken. Case can be closed until further notice.
