General Report Comments: I was accompanied By Inspector Simamane To Visit the address.

We were then met by Zanele's at the main gate. We shared a complain and he granted us access to enter the property. He then showed us where the dog normal goes out And it was blocked by bricks just at the main gate. He also explained that once the gate opens the dog at times goes out and they are trying to teach the dog. The dog was inside the property when we were doing the inspection.

Zanele's son further stated that they don't wanna chain the dog. The dog was observed roaming freely on property having access to portable water and the living environment is well maintained. The dog appears to be in good health and there is no sign of a chain and a runner. The dog has access to adequate kennel that can protect the dog from all weather elements.

I strongly believe the case can be closed. There is no contravention of the Animals Protection Act 71 of 1962 and there is no further action that can be taken. Case closed.
