General Report Comments: Was met with owner. Said the dog gets chained because she is on heat and then runs out of the gate. She already has three puppies currently of the age of 12 weeks. The dog was unchained upon arrival. Chain is inadequate but owner said he will not chain her again. Gave office number for sterilization. She is feeding three puppies of 12 weeks and is slightly underweight. Educated owner on more nutrition. She also has an injured front leg (slightly limping) as she apparently jumped and hurt herself. Was at the vet who gave antibiotics and pain meds but more than two weeks ago. Told owner if leg does not get better they must take her back to the vet. Her puppies are weaned and kept in a back room of property. They get out in gaps in yard which the owner promised to fix as when they get bigger the space will no longer be adequate. The area is also full of feces and dirty water. Owner gave clean water and said he has someone coming to clean tomorrow. Puppies also slightly underweight so educated on deworming.
