General Report Comments: Met with the son and the mother. The pigs has improved in bodily condition and they got medicine for the mange dogs. The yard is still filthy, muddy and full of hazards. Told to properly clean the yard. There is also two females enclosed at the bottom of the property, adeqaute space but muddy and not clean only little water. Told to clean, provide bedding/subtract and ensure they always have water. They are enclosing them to keep them away from the males. Also, upon arrival a dog could be heard crying, when approuched the dog was enclosed in one of the other houses on the property. Once again the owners had no idea how the dog got inside. I said that that is a massive concern as they already had a dog died thatw as enclosed and they did not know about. There is only three dogs left on the property and +- 8 pigs adult male pigs, 5 piglets and two adult female pigs
