General Report Comments: Upon arrival i met Sherwin he granted me access.

The gate of the enclosure was opened but the dog was just resting near the kennel.

On my observation i didnt see any external parasites on the dog and the the blood that i saw on the ears has moved. The ears are healing nicely from Fly strike as proof that the medication is working

The dog has access to adequate kennel and portable water is provided

The living environment is clean and hygienic. The dog in question is clinically alert.

I strongly believe the case must be closed.

There is no contravention of the animals protection act 71 of 1962 and there is no further actions that can be taken.

ACTIONS

NO ACTION REQUIRED
