General Report Comments: The large dog free roams the entire yard and sleeps outside. The dog has access to two large wooden kennels in the front and two large wooden kennels in the back yard. In the front yard the two kennels are placed underneath a stoep area. Near the kennels are metal bowls filled with water. Empty metal bowls were present - these bowls get filled with pellets twice a day. The small dog sleeps inside the house and is mostly in the house with the owner during the day. The entire yard was clean and well kept. Both dogs were in satisfactory body condition although both are old dogs.
