ADEQUATE SPACE AVAILABLE	Yes	
CLEAN LIVING ENVIRONMENT	Yes	
WATER AVAILABLE	Yes	
ADEQUATE SHELTER AVAILABLE	Yes	
ANIMALS IN GOOD CONDITION	Yes	
VETERINARY PROBLEMS / HEALTH CO	No	

General Report Comments: Mrs Winn has owned Winstead Stables for 45 years. She lives on the property with her own pets and has applied to adopt another dog at Springs SPCA. After a prehome inspection was conducted and approved, the Stableyard inspection was conducted. Throughout the property there are feral cats, and 40 have been sterilised with their ears clipped. There are several feeding stations for the cats throughout the property and the few seen were in satisfactory condition. If sick cats are seen they are caught and humanely euthanased.

At the time of inspection, there were 94 Mares and Geldings stabled and only one Stallion. The stableyard not only stables for clients, but are also a riding/competition school, partake and host competitions, as well as, house quarantined horses (the site has been declared a AHS free zone in the area). All horses are up to date with Flu and AHS vaccines with their passports kept in filed in the front office. All horses have their own care kits with all the necessary supplements, treatments, tack etc. Every house is either sprayed for flies or have fly prevention like masks, fringes, body suits. The horses are routinely checked for hooves, dentals, health by the various roleplayers.

Stables have a deep litter system where faeces and wet patches of urine are removed manually every day. All manure is driven off the property daily. All facilities are neat and clean. A feed board is available showcasing the different dietary requirements for each horse . All roughage feed is stored on pallets underneath roofed areas, and all concentrates are stored in a three compartment trolley. All stables have water buckets, as well as the paddocks. All the paddocks have shade netted roofing for shade unless there are trees in the paddocks. Large drums or baths are used for water.
