The female Africanis dog is thin from loss of body condition after

The female Africanis dog is thin from loss of body condition after

General Report Comments: Upon arrival all six dogs were free roaming in the front yard. The female Africanis dog was thin and one could see she had recently been lactating. No puppies were present on the property. Mrs Crawford informed us that she gives the puppies away to good homes. The female Jack Russel was not pregnant, lactating or on heat. The other four dogs were all males. Five of the six dogs were in satisfactory body condition.

Sterilisation of the dogs were discussed with Mrs Crawford who admitted they wanted to sterilise the female dogs but do not have the funding for it. The Springs SPCA has offered to sterilise the female dogs.
