General Report Comments: Upon inspection, three dogs were observed on the property, all of which appeared to be in satisfactory body condition.

The crossbreed dog was found confined in a small passage area with no kennel or suitable shelter, only an umbrella providing limited shade. The area lacked grass or soft flooring. The dog's food bowl contained old food, though water was available.

When enquiring about the confinement, the owner explained that it was due to the dog having a history of biting.

The remaining two dogs have free access to the property and the house, where they are provided with food, water, and indoor sleeping arrangements, including sleeping on the bed.

A formal warning was issued to Rita and Monty regarding the inadequate shelter and confinement conditions of the crossbreed dog.

**ACTIONS**

Warning Issued IHJ814285
