General Report Comments: At House No 17A there was a young female Africanis type dog chained on a short thick chain . Within the chained perimeter it was clean with no excess dog faeces; a large dirty bucket containing dirty water was present as well as a metal kennel. The dog is apparently chained because the yard is not secure to confined the dog within and allow it to free roam. I discussed the concern of the dog chained and suggested that the family decide if they can secure the yard or surrendering the dog. I informed the family I would return the following day to see what the decision is.
