CHECKLISTS

General Report Comments: 1. Arrival and Offloading

At approximately 13:30, a total of 200 pigs arrived at the abattoir. The offloading process was monitored and took approximately 45 minutes to complete.

During offloading, it was observed that the top loading ramp was positioned slightly too far from the truck, causing some pigs' legs to slip between the ramp and the rail. This issue was rectified by moving the truck closer, which facilitated a smoother offloading process.

2. Condition of the Pigs

Deceased on Arrival (DOA): 6 pigs were found dead upon arrival.

Emergency Slaughter: 3 pigs sustained injuries during transit and required immediate slaughter.

General Condition: The majority of the pigs exhibited scratch marks on their bodies, likely caused by trampling during transportation.

3. Holding and Care

Lairage Placement: 191 pigs were placed into the lairages and provided with water.

Emergency Slaughter Pigs: The 3 injured pigs awaiting emergency slaughter were also provided with water to cool them down.

Rest and Feeding: The pigs will be rested and fed overnight in preparation for slaughter.

Slaughter Schedule: These pigs will be the first to be slaughtered in the morning.

ACTIONS

OTHER

Inspection of facility to monitor slaughter

REPORT OUTCOMES

Follow-up inspection to be conducted 2025-02-12
