General Report Comments: The front of the property is enclosed with palisade fence and front gate. The rest of the property is enclosed with precast walls of 1.8m height. The front and back yards are separated with precast walls on the left and one steel gate on the right. The dogs are kept solely in the back yard, with access to two large dome kennels; however, the dogs do sleep inside the house at night. The dogs have grown up with cats; therefore, are cat friendly. The female cat was found sleeping inside the house on a bed. Food and water for the cat was found in the kitchen. The hedgehog is kept in a glass enclosure in one room. The floor of the enclosure is covered with artificial grass. One side of the floor has a heating pad. A nesting box is present within the enclosure and food and water bowls. The hedgehog is fed a diet of cat pellets and meal worms. The hedgehog is confirmed to be an exotic one, and is in satisfactory body condition. I did suggest the hedgehog's nail be clipped to prevent them from becoming overgrown and causing injury.
