DIAGRAM OF PROPERTY ON REVERSE OF THIS PAGE

* The owners has a big plot on a farm. In their front yard, there is a seperation built for the pet farm animals so that the Boelboel and other dogs cannot get to them.

* Inside the enclosure they have 3 seperate enclosures to Enclose the farm pets (sheep, chicken and rabbits) at night to prevent predators from predating on them.

* During the day they rotate the female and male rabbits to room freely and are planning to sterilize the male rabbits after the 25th of May 2024. I asked Catrine to send us the proof of this to prevent breeding.

* The pet sheep and some of the chicken sleeps together with the rabbits. The sheep does not bully the rabbits.

* They have automatic water bowls filling it up with river water.

* They have adequate shelter, are in good condition.

* The enclosures were clean and they have proper pest control.

* Catrine is always at home spending time with the farm pets to keep an eye on them.

Bennie & Chloe can go home as soon as the other male rabbits are sterilized.

Follow-up: 25 May 2024
