Comments:	Elani and I,Hugh arrived at Rossiter Street 8.We then called on the outside of the property . One of the tenants then opened the door and came outside to speak to us. We then introduced ourselves and she mentioned that she cannot recall who notified us about the cat but suspected it was one of her sons friend. She then started explaining to us that they have three cats and that they leave their window open for their cats in the evenings and that the ginger cat which has been a problem constantly comes inside in the evenings and causes chaos in their house. When asked when last they saw the cat she mentioned that she wasn't here this weekend but that she hasn't seen the cat in a few months. The neighbour then overheard us speaking and told us that the cat was at 8 Rossiter street on the weekend when nobody was home.They then asked us to set a cat trap inside a broken down car outside the property because he sleeps there throughout the night. We then decided against this because it's outside the property and nobody would be able to look after the trap.We then advised them to wait until the cat is inside the house and trap the cat and notify us . Follow up Thursday.
