Follow-Up Date:	2024-08-08
Comments:	We wanted to take Lady home but her wound after sterilization swoll up and had clotted blood . We took her to WAHG and the Veterinarian put her on anti inflammatories and said she must rest for about two days. We then went to the owner and informed them why Lady will be coming home in the next day ir two . They understood. To see whether Lady can be returned by tomorrow .
