Comments:	The owner Mr NR Ennis and his wife came to the SPCA to explain their side of the story afer receiving my Warning to them. They explained that they were at WAHG with Maya on the 10th of April 2024 and received Bioscrub, Cephalexin, Dexafort etc. Further tests werent done and a follow up was not requested by the veterinarian. They brought the Bioscrub to show me as well. They said after going to WAHG the consdition of Maya worsened drastically . I thaned them for coming all the way to explain the situation to me and they gave me a copy of their WAHG bill (attached to physical copy of case). NFA
