Date:	2024-07-18
Time:	11:01
Inspector:	INSPECTOR ONE
Type:	COLLECTION - ANIMAL COLLECTED
Follow-Up Date:	
Comments:	Hugan and I went to the address. Johan told us that his dogs barked, he went outside and saw a cat dragging its hind legs.He called us and posted it on the neighbourhood group and got the possible owners. The cat acted like a feral cat hissing, biting but was luckily semi confined. Hugan and I managed to trap the cat in-between a pallet and got the cat into the box. I told Johan that he must please tell the owners to meet us at WAGH as we are going there because of the injury . When we got there the owners already wait d for us and we had to give them the news. I got their details. Johan also followed us and explained to his neighbours what he saw. The cat remained feral even though the owners were there. Dr Elani looked at the cat and admitted it on their name and kept the cat in our cat box as they needed to sedate it before removing the cat.
