CHECKLISTS

General Report Comments: Hugh and , Elani arrived at the facility and met with Rickus to see whether the cats have been caught. We walked towards where the cats are and I saw a bakkie (CN12556) unloading sheep. They did not use the provided ramps as previously stated and one of the sheep had an injured leg and was for emergency slaughter. It turned out it was Tomis own staff members and their sheep doing this.

I immediately rectified the situation and confronted Rickus about this.

Rickus then stopped walking with us and spoke to someone. Hugh and I decided to go and have a look at the cats. We saw 5 cats in total of which two were definitely in bad condition. There were no signs of the cats being trapped.

We went back to Rickus and met Thomas who is part owner of the company . I expressed all my concerns and showed them how they should use the ramps. The ramps wer rusted and clearly not being used with a pole and a jacket lying in it.

I told him that I will send a warning again. Rickus got defensive on this.

I emailed warning 040 regarding the sheep and the cats. (See attached)

To follow up 13 August 2024

ACTIONS

Warning Issued 040

REPORT OUTCOMES

Follow-up inspection to be conducted 2024-08-13
