ANIMALS IN GOOD CONDITION	No ***	The dog is underweight
VETERINARY PROBLEMS / HEALTH CO	Yes ***	Underweight
CONFINEMENT OF ANIMALS	Static Chain - adequate length	Dog is too aggressive

General Report Comments: I, Hugh arrived at the property. I then saw Chantell Joseph and I greeted her as we have spoke before. I then explained to her that I was there to do a follow up.

I then noticed that Suzy was on a static chain and had no water. I then explained to her that the dog has to be put on a runner as the dog is not supposed to be kept on static chain. She then mentioned that the dog is too aggressive and constantly wants to bite people this is why the dog has to be on a chain. I then asked her when she will be able to build the runner and she mentioned that she does have the wire. She also said will be able to ask one of the men who work for her to build the runner within a week.

I then told her that she needs to fill water for the dog now and she did so. She also mentioned Suzy knocks over her water and I explained to her how she should fill a crate with bricks and place the water bowl on top to prevent knockover.

I then asked what they feed Suzy and she said that they feed her bobtail but loose packets which they buy. I then asked that they buy some and have some when I arrive next week. They agreed.

I then explained to her that we will be coming back in a week to check on runner.

To follow up within 7 days.
