

VETERINARY REPORT

To whom it may concern

On 16 November 2023, dog was confiscated from owner as owner failed to comply to SPCA's previous warnings.

ANIMAL DETAILS

Species: Canine
Breed: Boerboel cross
Sex: Male, intact
Age: 6-7 years
Name: Bullet
Description: Tan

EXAMINATION FINDINGS

The dog presented in poor condition. He had a body condition score of 2/9 (ideal 5-6) based on the Nestle-Purina Body Condition System and showed muscle loss.
Engorged ticks attached to skin.

COMMENTS

In my professional opinion, this animal has been chronically neglected. This degree of fat and muscle loss indicates lack of nourishment and that dog has been fed inadequately.
Denying the dog food/ sufficient food has resulted in an undernourished dog and is a sign of neglect.

Yours sincerely
